

Catalog sheet

ASO 04

komaxit surface treatment

ASO 04 is a new dryer with a Komaxit surface finish designed for a maximum of 12 pairs of shoes. The dryer is mounted on the wall. Drying takes place by forced circulation of heated air, which, unlike other systems, prevents the growth of bacteria in a humid environment. The drying temperature is a maximum of 20 degrees Celsius above the ambient temperature.

Complete delivery

- dryer with arms
- fastening material

Standard versions

- ASO 04 dryer for 12 pairs of shoes
 komaxit surface treatment
- SAZ 04 rear wall for ASO 04 - for separating the wall behind the dryer and
 preventing air leak

Technical details

- power supply 230 V, 50 Hz
- power consumption 620 W
- air temperature max. 20 °C above ambient temperature

Construction readiness requirements

- Prepared electrical supply 230 V, 50 Hz - CYKY 3C × 1.5 ÷ 2.5 cable, protected in the switchboard by a fuse element with a nominal value of 10 A and terminated with a 1 f socket.
