

Installation and User Manual

KZ 1 – Cantilever for Wall-Hung Toilet

Basic technical data

Anchor bolt spacing:	180 or 230 mm
Distance between flush and waste pipe:	135 mm
Distance (vertical) of the waste pipe and anchor bolts.	100 mm
Product website:	KZ 1

Description

- The KZ 1 is a galvanized steel cantilever designed for mounting wall-hung toilets onto less load-bearing walls. The cantilever distributes the load into the wall and the floor.
- The KZ 1 is not intended for installation in drywall partitions (for this purpose, the KZS 1 cantilever should be used)..

Installation

Construction Preparedness

- The wall and floor must be properly prepared.
- The waste pipe must be prepared in right place.

Cantilever Installation

- Secure the cantilever to the floor using appropriate anchor fasteners (according to the type of wall and floor).
- Adjust the correct height of the anchor bolts considering the final floor level.
- Attach the waste and flush pipes to the holders.
- Set the correct length and spacing of the anchor bolts (studs) based on the final wall thickness and the type of toilet bowl.
- Finish the walls and floor.
