AUZ 010

Antivandal stainless steel free standing toilet, outlet directed to the back

The **AUZ 010** is a stainless steel antivandal toilet with a matte finish designed as freestanding against the wall. It is suitable for locations where a standard wallmounted toilet cannot be installed for example, due to a thin load-bearing partition wall. The standard AUZ 010 model features outlet directed to the back (the version with outlet directed downwards is the AUZ 04).

Complete sets can be assembled using the AUZ 3 automatic sensor flushing system, the AUZ 3P automatic piezo-button flushing system, the BSAZ 01 antivandal automatic flushing system, or any flushing system with flushing tank.

The toilet does not include a plastic seat and, thanks to its damage resistance, is designed primarily for social facilities with demanding operations such as highway rest areas, prisons, and pubs where easy hygiene maintenance is required.

We also manufacture a version of the toilet for the physically disabled, code AUZ 010 INV.

You can find other variants of toilets in the stainless steel toilets or stainless steel security toilets section.

The toilets are made of stainless steel of class ČSN 17240 (AISI 304). Other materials on request (e.g. AISI 316).

Complete delivery

- Stainless steel WC
- Anchoring material

Available variants

- AUZ 010 Antivandal stainless steel free standing toilet, outlet directed to the back

Technické detaily

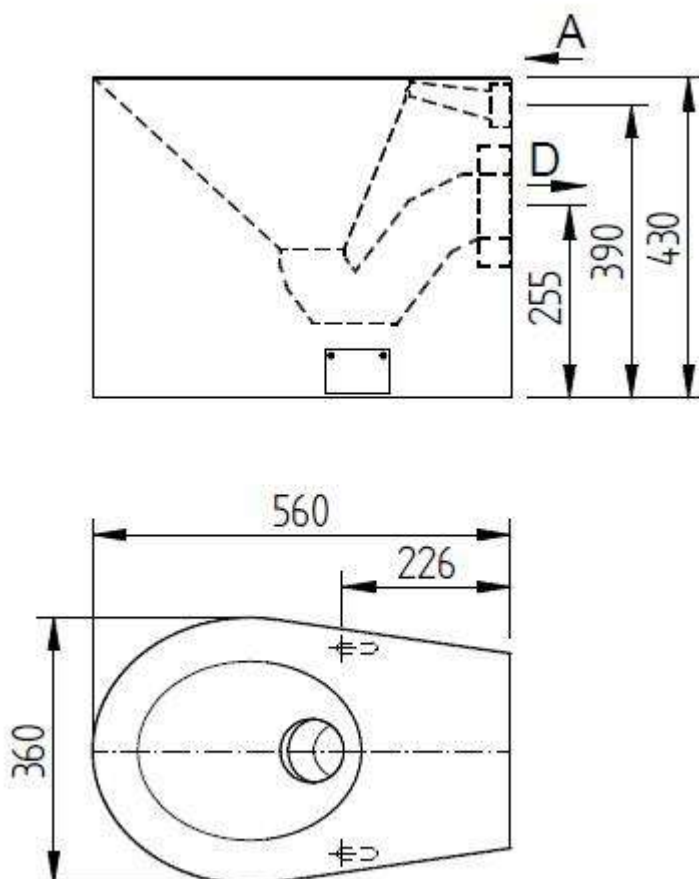

- Water inlet d= 34-50 mm
- Min. waterflow capacity 70 l/min
- Outlet d = 90 mm
- Weight 18 kg

Construction readiness requirements

- Set-up outlet into the floor accordingly the diagram $d = 110$ mm with rubber sleeve for pipe $d = 90$ mm.
- Set-up water inlet according to the diagram $d = 34$ -50 mm and chosen sealing.
