AUZ 010 INV

Antivandal stainless steel free standing toilet, for physically disabled, outlet directed to the back

The **AUZ 010 INV** is a freestanding stainless steel toilet with a matte finish, designed for physically disabled. This model is based on the standard AUZ 010 but has been dimensionally extended and raised to comply with regulations for products intended for the physically disabled. It includes a removable backrest recommended by the League for Wheelchair Users' Rights. The toilet features an antivandal design without a seat to prevent damage. The outlet is directed to the back (a version with outlet directed downwards AUZ 04 INV, is also available).

It is advisable to equip the toilet with the AUZ 3 INV automatic pressurized water flushing system with pressurized water featured with distant flushing (suitable for the physically disabled) or any standard flushing system with flushing tank.

Thanks to its resistance to damage, the AUZ 010 INV is designed primarily for social facilities with demanding operations such as highway rest areas, pubs, etc. where easy hygiene maintenance is required.

You can find other variants of toilets in the stainless steel toilets or stainless steel security toilets section.
