AUZ 06N

Stainless steel toilet with flushing tank for free standing

The **AUZ 06N** is a free standing stainless steel toilet featured with a stainless steel flushing tank. The outlet can be directed into the wall using a suitable waste pipe. The toilet comes equipped with a hardened plastic seat (a version without the seat and mounting brackets is available upon request). This free standing stainless steel unit is ideal for locations where there is limited load capacity of load-bearing wall for wall mounted toilet and insufficient water pressure and water flow for flushing (necessitating the use of a flushing tank).

Thanks to its durability, the toilet is designed primarily for high-traffic sanitary facilities.

The outer casing is made of 1.5 mm thick stainless steel sheet, the upper load-bearing section is made of 2 mm sheet metal.

Other variants of stainless steel toilets available in the stainless steel toilets or stainless steel security toilets section.

The toilets are made of stainless steel of class ČSN 17240 (AISI 304). Other materials on request (e.g. AISI 316).

Complete delivery

- Stainless steel WC
- Hardened plastic seat
- Flushing tank including flushing system

Available variants

- AUZ 06N free standing stainless steel toilet with flushing tank, including grey plastic seat
- AUZ 06N.CS free standing stainless steel toilet with flushing tank, including black plastic seat
