AUZ 08

Stainless steel freestanding toilet, with hardened seat, back directed outlet

The AUZ 08 is a stainless steel toilet with a matte finish. For enhanced users comfort, it is equipped with a grey seat and lid made of hardened plastic (a version with a black seat, AUZ 08.CS, is also available). The AUZ 08 is designed as freestanding against a wall and is suitable for locations where a standard wall mounted toilet cannot be installed for instance, due to a thin load-bearing wall. The standard AUZ 08 model features a back directed outlet (the version with outlet directed downwards AUZ 02). It is advisable to equip the toilet with the automatic flushing system with pressurized water AUZ 3, automatic flushing system with a piezo button AUZ 3.P (or the antivandal BSAZ 01 flushing system), or any standard flushing system with a flushing tank.

Thanks to its damage resistance, this toilet is designed primarily for social facilities with demanding operations such as highway rest areas, pubs, etc. where easy hygiene maintenance is required. We also manufacture a version for the physically disabled code AUZ 08 INV.

You can find other variants of toilets in the [stainless steel toilets](#) or [stainless steel security toilets](#) section.

Complete delivery

- Stainless steel WC
- Plastic seat
- Anchoring material

Available variants

- AUZ 08 Stainles steel freestanding toilet, incl. grey hardened seat, back directed outlet
- AUZ 08.CS Stainles steel freestanding toilet, incl. black hardened seat, back directed outlet
