BSAZ 5

Pre-wall system for WC with anti-vandal stainless steel cover

BSAZ 5 is a pre-wall flushing toilet system for a wall-hung toilet fitted with a vandal-proof stainless steel cover - with durable stainless steel safety buttons. The cover is fixed with safety screws, so it cannot be removed without special tools. The system is suitable for spaces where it is necessary to use toilet flushing from the cistern, but at the same time there is a risk of increased damage or destruction of conventional plastic covers. The robust vandal-proof stainless steel cover contains stainless steel control buttons that are resistant to destruction (unlike conventional plastic buttons).

The stainless steel cover is made of AISI 304 stainless steel. For the treatment of stainless steel products, we recommend using Würth products - preservation (order no. 0893 121 K), cleaning (order no. 893 121 1).

Complete delivery

- pre-wall system with cistern
- stainless steel cover with anti-vandal buttons

Stainless steel cover BSAZ 5 – separate stainless steel cover with anti-vandal buttons. Can only be used with the pre-wall system supplied by AZP.
