

Catalog sheet

SPS 02

Solar shower column – volume 28 liters

SPS 02 is an integral stainless steel shower column using solar energy to heat water. Part of the column is painted black to increase the efficiency of water heating. The temperature of the flowing water can be regulated using ball valves located on the front of the column. The column is equipped with a shower rose, which is connected with a hose for greater versatility. The column is suitable for private swimming pools, gardens, etc. It is intended for installation in an open space and there are two possible ways of anchoring it - attaching the anchor construction using dowels and screws or anchoring it using cables when installing it, for example, on a lawn.

The columns are made of stainless steel **class AISI 304**. From other material on request (e.g. AISI 316). For the treatment of stainless steel products, we recommend using the Würth detergents – material preservation (order no. 0893 121 K), material cleaning (order no. 893 121 1). For the treatment of chrome-plated parts, we recommend the Larrin detergent.

Complete delivery

- Integral stainless steel shower column
- Shower arm with hose
- Ball valve – 2pcs
- Anchoring construction
- Connecting material

Available variants

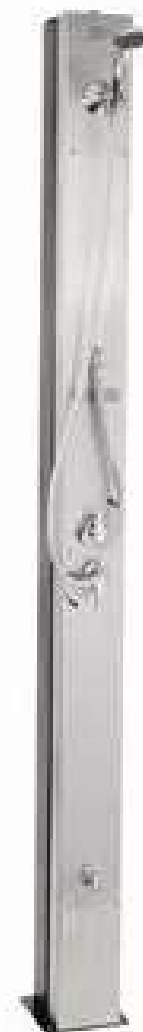

- SPS 02 solar shower column - volume 28 liters

Technical details

- Water inlet G 1/2"
- Volume of tank 28 l
- Water pressure 0,1 – 1,0 MPa
- Water flow approx 6 l/min
- Dimensions 180 x 130 x 2000 mm
- Weight 16 kg

Construction readiness requirements

- When anchored with dowels
- Appropriately reinforced floor (concrete, etc.)
- Set up a water inlet G 1/2"
