

Catalog sheet

SPS 03

Solar shower column – volume 60 liters

The SPS 03 solar shower column is a new shower column that uses sunlight falling on the surface of the casing, which is covered with black comaxit, to heat the water in the tank. The water temperature can be regulated with a lever tap, and the column includes a shower rose.

The volume of heated water of the solar column is 60 liters. The body of the column is circular shape and the comaxit surface is more accessible to sunlight, which results in faster heating.

Equipped with quality components and design purity predetermine the column for more demanding clients.

The column is supplied including an anchor construction or can be screwed into the ground using dowels.

This solar shower column can be a suitable addition to private swimming pools or outdoor saunas.

The columns are made of stainless steel **class AISI 304**. From other material on request (e.g. AISI 316). For the treatment of stainless steel products, we recommend using the Würth detergents – material preservation (order no. 0893 121 K), material cleaning (order no. 893 121 1). For the treatment of chrome-plated parts, we recommend the Larrin detergent.

Complete delivery

- Integral stainless steel shower column
- Shower arm
- Lever tap with fitting
- Anchoring construction
- Connecting material

Available variants

- SPS 03 solar shower column - volume 60 liters

Technical details

- | | |
|------------------|--------------|
| • Water inlet | G ½ " |
| • Volume of tank | 60 l |
| • Water pressure | 0,1 – 1 MPa |
| • Water flow | 9 liters/min |
| • Diameter | 200 mm |
| • Height | 2070 mm |
| • Weight | 31 kg |

Construction readiness requirements

- Into the hole 500 x 500 x 160 fixed installation frame
- Water inlet G 1/2" external
