SPS 04

Piramidal shower column

The **SPS 04** pyramidal column is a new addition to the shower columns. Its design is made entirely of stainless steel and is based on the **SPS 01** column. Thanks to its durable stainless steel design, it is suitable for placement in public places - aqua parks, outdoor and indoor swimming pools, sports facilities.

SPS 04 is equipped with one or two shower arms. The water is activated by a push valve. On request, it can be equipped with thermostatic valves or piezo button control.

The columns are made of stainless steel class AISI 304. From other material on request (e.g. AISI 316). For the treatment of stainless steel products, we recommend using the Würth detergents – material preservation (order no. 0893 121 K), material cleaning (order no. 893 121 1). For the treatment of chrome-plated parts, we recommend the Larrin detergent.

In addition to the SPS 01 and SPS 04 shower columns, we also offer integral stainless steel shower columns with solar water heating **SPS 02** (volume 28 l) and **SPS 03** (volume 60 l).

Kompletní dodávka

- Integral stainless steel shower column
- Push valvel 1, 2 pcs
- Shower hose 1, 2 pcs
- Anchoring construction
- Connecting material

Available variants

- SPS 04.1 Integral stainless steel shower column with one shower
- SPS 04.2 Integral stainless steel shower column with two showers

Technical details

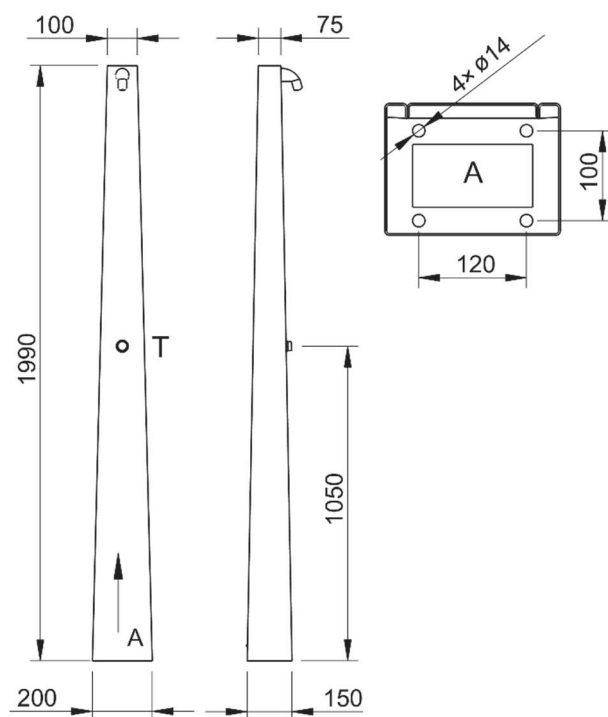

- Water inlet G 1/2"
- Water pressure 0,2 - 0,6 MPa
- Water flow approx 9 l/min (one shower arm)
- Dimensions 200x150x1990 mm
- Weight 25 kg

Requirements

- Appropriately reinforced floor (concrete, etc.)
- Set up a water inlet G 1/2"
