

Catalog sheet

Shower seats

Description

In addition to grab rails, a shower seat is an essential part of shower equipment. Providing safe seating for a person with disabilities during showering significantly improves both their safety and comfort. Depending on the size and layout of the shower, wall-mounted or free-standing seats and stools are available.

The seats are available in the following variants:

- Wall-mounted shower seat
- Folding shower seat
- Folding shower seat with support leg
- Shower stool

 - Dimensions 440x450x460
 - Stainless steel tube d=32
- Shower stool
 - Dimensions 440x300x478
 - Stainless steel tube d=32

Construction readiness requirements

For installation, use a drill bit with a diameter matching the supplied wall plugs. To attach the seat to the wall using the supplied screws and wall plugs, all anchoring holes must be used.

The supplied fasteners are intended for walls with adequate load-bearing capacity (solid brick, concrete). For walls made from other materials, suitable fasteners must be selected.
